

PAEDIATRIC IMAGING INTERPRETATION

Imaging interpretation of commonly encountered paediatric disease.

COURSE OVERVIEW

We've combined the best features of a face to face lecture and the convenience of online learning in our new Webinar format. Enjoy interactive online learning modules, live online lecture series, Q&A sessions, and guided case reviews to reinforce the fundamental principles of Paediatric imaging interpretation.

The curriculum covers imaging of the head, chest, abdomen and musculoskeletal system in 5 modules. Each module is composed of a lecture followed by an interactive case review session where delegates review cases with X-ray, Ultrasound, CT and MRI.

The course includes a pre-test, 4 modules of online pre-course work, live streamed lecture and Q&A series, guided case reviews and a post-course test on completion.
