

CRITICAL CARE IMAGING INTERPRETATION ESSENTIALS ONLINE

Recorded instance of our Critical Care Imaging course.

Diagnostic imaging and interpretation have become essential to guide intensive care practice and patient management. The ability to interpret critical care images is becoming even more essential in handling emergency situations and making confident decisions. Lightbox's Critical Care imaging interpretation course provides a comprehensive overview of X-ray, Ultrasound, CT and MR imaging of pathology of the brain and skull, chest, abdomen and pelvis commonly present in the critical care setting.

The course includes a pre-test, 5 modules of online pre-course work, recorded lectures and guided case reviews for each module (10 cases per set), and a post-course test upon completion.

QUICK INFO

5 modules
Brain + Skull, Chest,
Abdomen + Pelvis.
